

EuroFoodChem XVIII

October 13-16, 2015

Madrid, SPAIN

Topics include those considered at the Societal Challenges related with health, food safety, sustainable agriculture, marine and maritime research and the bioeconomy, focused on

“UPCOMING CHALLENGES IN FOOD SCIENCE”

Scope and Topics

Bioactive food constituents and functions

Functional foods

Chemical changes induced by processing and storage

Risk/benefits evaluation of food components

Novel and rapid detection techniques for food quality assessment

Chemistry behind sensorial, flavour and textural properties

Exploitation of agri-food co-products

Hosted by

Institute of Food Science, Technology and Nutrition (ICTAN-CSIC)
European Association for Chemical and Molecular Sciences (EuCheMS)
